BACKGROUND:
Macrophage Inflammatory Protein 2 (MIP-2), also known as CXCL2, is a small cytokine that is secreted by monocytes and neutrophils at sites of inflammation. MIP-2 functions through the chemokine receptor CXCR2 to act as a chemotactic agent for leukocytes and hematopoietic cells.

Recombinant mouse Macrophage Inflammatory Protein is a non-glycosylated protein monomer, containing 73 amino acids and having a molecular mass of 7.9 kDa.

Cat. No.:  
RP2080

Alternate Names:  
CXCL2

AA Sequence:  
AVVASELRCQ CLKTLPRVDF KNIQKLSVTP  
PDPHCAQTEV IATLKGQKV CLDPEAPLVQ  
KIIQKILNKG KAN

TECHNICAL INFO

Source:  
E. coli

Physical Appearance:  
Sterile Filtered white lyophilized (freeze-dried) powder.

Formulation:  
10 mM sodium phosphate, pH 7.5

Stability:  
Lyophilized product is very stable at -20°C. Reconstituted material should be aliquoted and frozen at -20°C. It is recommended that a carrier protein (0.1% HSA or BSA) is added for long term storage.

Reconstitution:  
Centrifuge vial before opening. When reconstituting the product, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution. It is recommended to reconstitute the lyophilized product with sterile water at 0.1 mg/mL, which can be further diluted into other aqueous solutions.

Protein Content and Purity determined by:  
- UV spectroscopy at 280 nm.
- RP-HPLC calibrated against a known standard.
- Quantitation against a known standard via reducing and non-reducing SDS-PAGE gels.

Endotoxin Level:  
Endotoxin level, as measured by LAL analysis, is <0.01ng/ug or <0.1EU/ug.
